### DETAILED ACTION

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-3, drawn to an article (i.e. a rust resistant steel), classified in class 148, subclass 320.
- II. Claim 4, drawn to a process of manufacturing a Ca-containing rust resistant steel, classified in class 148, subclass 541.

2. The inventions are distinct, each from the other because:

Inventions I and II are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the product could be made by a materially different process, such as powder metallurgy.

3. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

4. A telephone call was made to Austin Miller on April 3, 2001, to request an oral election to the above restriction requirement, but did not result in an election being made.
